# WELCOME TO THE TRI-COUNTY R/C FLYING CLUB

## Tri-County R.C. Flying Club

Thank you for your interest in the Tri-County Flying Club. The club is a group of individuals of various backgrounds who share a common interest in radio-controlled model aircraft. By joining together, we help each other become better modelers and pilots. Our association also enables us to do things that would be difficult or impossible to do individually, such as acquiring flying sites, holding organized events and competitions, providing flight instructions, and promoting this great hobby to others.

This club doesn't limit the type of aircraft you can fly. Sport planes, acrobatic, scale models, helicopters, gliders and just about anything else with wings is welcome at the club flying fields.

Don't feel hesitant about joining the club if you have no prior experience in aero modeling. We have a training program designed to safely take you from the point of having no experience at all to where you will feel confident in piloting your own aircraft. Building and learning to fly a model airplane is challenging, rewarding, and (most importantly) a whole lot of fun! You are invited to attend one of our monthly meetings. They are held on the first Thursday of each month in Anderson, SC at the Anderson Regional Airport. Meetings begin at 6:00 PM and are held in the Airports Conference room.

If it is several weeks until the next meeting you can usually find a number of the club members at the field on most Saturday mornings, weather permitting. You may also contact one of the club officers who are listed above.

## Club Field

The Tri-County R.C. Flying Club maintains a flying field at the Anderson Regional Airport.

## Academy of Model Aeronautics
